

SCA

AUTOMATIC
SINGLE-
CLIP
MACHINE

- Fast:
Up to 300 cycles/min.
- S-clips from rolls
- Low operating cost due
to less air consumption
(4 bar)
- Easy to clean:
All basic parts made
of stainless steel
- Simple to operate
- Silent operation

Innovation, Service, Customer Focus

FAST AND SMOOTH: THE SCA AUTOMATIC SINGLE-CLIP MACHINE 5004/6004

Applications

High performance machine for links of chubs (narrow beef/pork rounds and collagen casings) up to 46+ mm in diameter. Typical products are German Rindswurst, Speckwürste (Czech Republic and Slovakia), Austrian Knackers, Swiss Cervelats.

The discharge offers maximum safety and enables a smooth operation.

Advantages

- Output: Up to 300 cycles/min
- Less downtime through clips from rolls
- Working pressure at 4 bar already
- Simple to operate
- All basic parts made of stainless steel
- Easy to clean
- Silent operation

Optional Equipment

- Linking arm (stainless steel) for connection stuffer/clipping machine
- Mobile mounting unit
- Stuffing horn (500 or 600 mm), casing brake
- Connection cable, connecting sleeve
- Maintenance unit

Function and operation

The SCA is connected and synchronized with a continuous stuffer. The clipping impulse is generated by the stuffer. An electric/pneumatic control provides automatic operation. The single clips are available as magazine rolls. Thus the previous reloading of individual clip strings is no longer required.

Technical data

SCA 5004/6004

Width:	320 mm
Depth:	270 mm
Height:	810 mm
Weight:	13.5 kg
Compressed air:	4-7 bar/ 0,4-0,7 MPa
Air consumption:	3 NL/cycle

Suitable clip sizes:

SCA 5004: S 524/528

SCA 6004: S 625/628
